PHAM THANH HIEN

1994, Feb. 21 | Senior Frontend Developer

1/20 Thang Long street, 4 ward, Tan Binh district, Ho Chi Minh city, Vietnam

(+84) 83-9199-121 | phamhien2102@gmail.com | hien-pham-a6787319a

RESEARCH INTEREST

"I am passionate about software development, with over 6 years of expertise (Web and Mobile development). I am also interested in studying machine learning and deep learning, actively exploring courses on platforms like Coursera to enhance my knowledge. I am looking for a great opportunity to gain more experience and knowledge for my career in Senior Frontend Developer."

EDUCATION & QUALIFICATIONS

University of Information Technology (UIT) *Ho Chi Minh, Vietnam*
Engineer of Embedded System *Sep. 2012 - May. 2017*

PERSONAL SKILLS

Programming Languages	React Native, Python, Dart, ReactJS, Typescript, Javascript, C/C++, Swift
Knowledge	OOP design pattern, Multi-threaded programming
Web	ReactJS, NextJS, Flutter (Dart)
Database	MySQL, PostgreSQL, Firebase
Linux skill	Makefile, Bash
Tools	Git, VS debugger
Technologies	Docker, Kafka Apache, GCP/AWS, CI/CD

RESEARCH EXPERIENCES

University of Information Technology *Ho Chi Minh, Vietnam*
Undergraduate student *Sep. 2016 - May. 2017*

- **Thesis:** Research and integrate a moving person detection algorithm on Raspberry Pi 3.
- **Team:** 2 members.
- **Description:** The research focuses on two main theoretical issues: **human detection** methods and **facial detection** methods from cameras. These two methods will be integrated into the Raspberry Pi 3 to develop a commercial product aimed at solving the security problem in smart homes through body and facial detection.

Undergraduate student *Sep. 2014 - May. 2015*

- **Euréka Competition:** Psychological state analysis device based on Galvanic Skin Response (GSR).
- **Team:** 2 members.
- **Description:** Design a sensor system to detect psychological and emotional states of individuals through sweat secretion based on Galvanic Skin Response, followed by analysis to provide solutions. Tasks including: Study the operation of Jennic JN-5148 boards; Explore the Weka toolkit (Waikato Environment for Knowledge Analysis); Study some algorithms: Bayesian Network, J48, and Sequential Minimal Optimization (SMO); Research the integration of GSR sensors into other medical devices; Analyze and design the power supply for the system; Study the physiology of the skin and electrodermal measurement.
- **Result:** Euréka encouragement award.

WOKR EXPERIENCES

AUTONOMOUS COMPANY *Ho Chi Minh, Vietnam*

Mobile and Web Developer *Mar. 2023 - Dec. 2024*

- **Project:** Build an app as ChatGPT.
- **Stack:** Flutter, AI.
- **Description:** Build a mobile app (Flutter) and a website (NextJS) being the same as ChatGPT. Users can chat with AI agents or switch to AI agents.

Mobile Developer *Nov. 2022 - Feb. 2023*

- **Project:** Build a game store and some games for blockchains.
- **Stack:** Flutter, blockchains.
- **Description:** Build some blockchain games (by Flutter) such as Pikachu, Block Puzzle, Jumps. Require building for 3 platforms: Android, Web and IOS.

Mobile & Hardware Developer *Feb. 2021 - Oct. 2022*

- **Project:** Autonomous Connect For Smart Devices.
- **Stack:** React Native, MQTT, Redux Saga, NFTs, Python.
- **Description:** Building a mobile app controlling smart devices such as Thermals, Smart Frames, Smart Lights as well as Smart Desks. Besides, building a python application embedded into Rasberry Pi 4 (called Smart Frames). Mobile will send NFTs and display them on Smart Frames.

Web Developer *Jun. 2020 - Jan. 2021*

- **Project: E-Commerce Website**
- **Stack:** ReactJS, Redux Thunk, Facebook Conversions APIs, Google Tag Manager.
- **Description:** Developing and improving features for the website of the company. This website provides all pieces of furniture built around this way of thinking - simple, sleek lines with a great deal of technological innovation in their design and functionality, all to provide people with some of the most advanced and ergonomic desks and chairs on the market.

Mobile Developer *Mar. 2020 - June. 2020*

- **Project:** SmartDesk 4.
- **Stack:** React Native, MQTT, Redux Saga.
- **Description:** SmarkDesk 4 – Using mobile app to control desks via MQTT (The Standard for IoT Messaging). Firstly, the app will connect Bluetooth to a desk, then send the connect information (wifi and password) in order that the desk can connect to server MQTT via the wifi. Secondly, App connects to the server to control the desk via MQTT. This app has other features such as scheduling, reporting and notification.
  - Init project for coding.
  - Integrating the features: “Connect the app to desks”, “Add /edit new schedules”, “Show reports”, “Manual adjustment: arrow to move up and down”, “Memorize the height”, “Users can choose the period”, “Overall sit & stand time during the chosen period”, “Login with facebook and google”
  - The locked desk: users can lock their desks so that no one can use it, especially children.
  - Notification: users can press any notification to control desks directly.

SAI GON TECHNOLOGY SOLUTIONS *Ho Chi Minh, Vietnam*

Mobile Developer *Apr. 2018 - Oct. 2018*

- **Project**: Video selfie, Face-searching and Ekyc system.
- **Stack**: React Native, Firebase cloud messaging, RX.js, Agora, Redux Thunk.
- **Description:** This is the company project. It is the chat app including a lot of features as video call, chatting 1-to-1, chat with a lot of members in a group.
  - Send/ receive messages with SignalR.
  - Implement the offline mode for mobile.
  - Fix the calling features.

Mobile Developer *Apr. 2019 - May. 2019*

- **Project:** KALMS in Singapore.
- **Stack**: React Native, One Signal, Realm, Redux Saga.
- **Description:** Be related to features of buying vouchers and reports, printing reports via wifi, Bluetooth connection.
  - Init project for coding.
  - Implement local data for the app.
  - Chat with clients in person for making clear requirements and dealing with difficult issues.
  - Upload the app to Apple Store and Play Store

HONORS & AWARDS

Dec. 2022	**Certificate**, Neural Networks and Deep Learning	*Coursera.com*
Nov. 2022	**Certificate**, Convolutional Neural Networks	*Coursera.com*
May. 2015	**Euréka encouragement award**, Student Scientific Research Competition – Euréka	*HCM, Viet Nam*
Sep. 2015	**Certificate**, The 10th Annual International Microelectronics Olympiad of Armenia (AMO2015)	*HCM, Viet Nam*
2012-2016	**Certificate**, Excellence scholarships for students in UIT	*HCM, Viet Nam*
